

Exp No: 12

EMBEDDED C PROGRAM TO MULTIPLY TWO 16-BIT BINARY NUMBERS

Program:

```
#include <reg51.h> void main()

{ while (1) {

    unsigned int num1, num2; unsigned long int product; num1 = 0x2222; num2 = 0xB BBB;

    product = (unsigned long int)num1 * num2;

    P0= product & 0xff; P1= (product & 0xff00)>>8;

    P2 =(product & 0xff0000)>>16;

    P3 =(product & 0xff000000)>>24;

} }
```
